

The organizational structure of **Inani Securities Limited (ISL)** comprises its Board of Directors, Key Managerial Personnel (KMP), and operational leadership teams managing its registered and corporate offices.

1. Board of Directors & Key Managerial Personnel (KMP)

The board handles strategic governance, legal compliance, and overall direction:

Name	Designation / Role	Core Focus
Lakshmikanth Inani	Chairman, Managing Director & Compliance Officer	Overall leadership, corporate strategy, and regulatory compliance framework.
Vishnukanth Inani	Whole-Time Director	Operational governance and day-to-day execution.
Nagendra Prasad Kasturi	Non-Executive Independent Director	Independent oversight, audit, and governance reviews.
Prachi Sachin Chandak	Non-Executive Independent Director	Independent oversight and committee participation.
Preeti Yadav	Company Secretary	Secretarial compliance, board coordination, and statutory filings.

2. Executive & Operational Leadership

The day-to-day business operations, depository services, and client relations are divided across its primary corporate and registered operational hubs:

- **Chief Executive Officer (CEO): Paresh Ashok Parte** (oversees the corporate operations framework based out of the Mumbai Corporate Office).
- **Registered Office Operations (Hyderabad): Srigopal Rathi** heads operations at the registered office, primarily managing Demat services and local client interactions.
- **Client Servicing (Corporate Office): Reshma Begum** leads the client support and back-office coordination teams.

3. Core Business Structure

Operationally, the company organizes its service delivery into specialized financial segments:

- **Stock Broking Division:** Handling execution across NSE and BSE in Cash, F&O, Currency Futures, and Interest Rate Futures.
- **Depository Participant (DP) Services:** Integrated directly via CDSL to manage client demat holdings and accessibility compliance.
- **Authorised Persons (AP) Network:** A distributed network of sub-brokers and authorized affiliates providing localized client terminal points across regions.
